

# LONG RANGE LANDSCAPING WORKING GROUP

by Barbara Weintraub

Last year the Lakeridge Falls Board of Directors created the Long Range Landscape Working Group was tasked with developing a long range plan to address the future needs for the community's landscaping infrastructure. After a comprehensive review evaluating the existing conditions of all the common areas, the Group recommended the creation of a park-like setting where less is preferable to more. The Group also suggested that wherever possible, Florida friendly material be used with consideration given to trees and shrubs that were cold hardy, and wind, disease and drought resistance. With the expertise of West Bay Landscaping we worked to achieve a balance between an aesthetic appeal of the landscape materials with responsible replacement and maintenance costs to create a blueprint for the next ten years for the Lakeridge Falls' common areas. As the Clubhouse renovation nears completion, Phase One of the Clubhouse Landscape Design plan is also ready to go!
